Dear Mr. Hothi-

Please find a link to a website where I've uploaded electronic copy of EPA's Removal Site Evaluation report for the Former Kaiser Smelter site. The file was too large to email so you can download this file from this location. Link here:

https://response.epa.gov/site/doc_list.aspx?site_id=14546

Thank you for your patience while we waited for all laboratory analytical work to be completed. The report provides a comprehensive summary of EPA's investigation including tables with analytical data, estimated quantities of hazardous substances, and other observations. It's important to note that this report does not discuss potential actions needed to address issues that were identified nor specific removal strategies. My colleague, Jeff Fowlow, and I will be discussing those items in the coming weeks after we've fully evaluated the information in the report. We will be in communication with property owners, partner agencies, and other stakeholders to discuss EPA's conclusions and look forward to ongoing cooperation.

If you have any issues downloading the file or questions, please don't hesitate to get in touch with me.

Thanks again,

Brooks Stanfield
